College of Architecture and Arts

LOCATION : Riyadh-Al-Qurain

TYPE :College of Architecture
and Arts

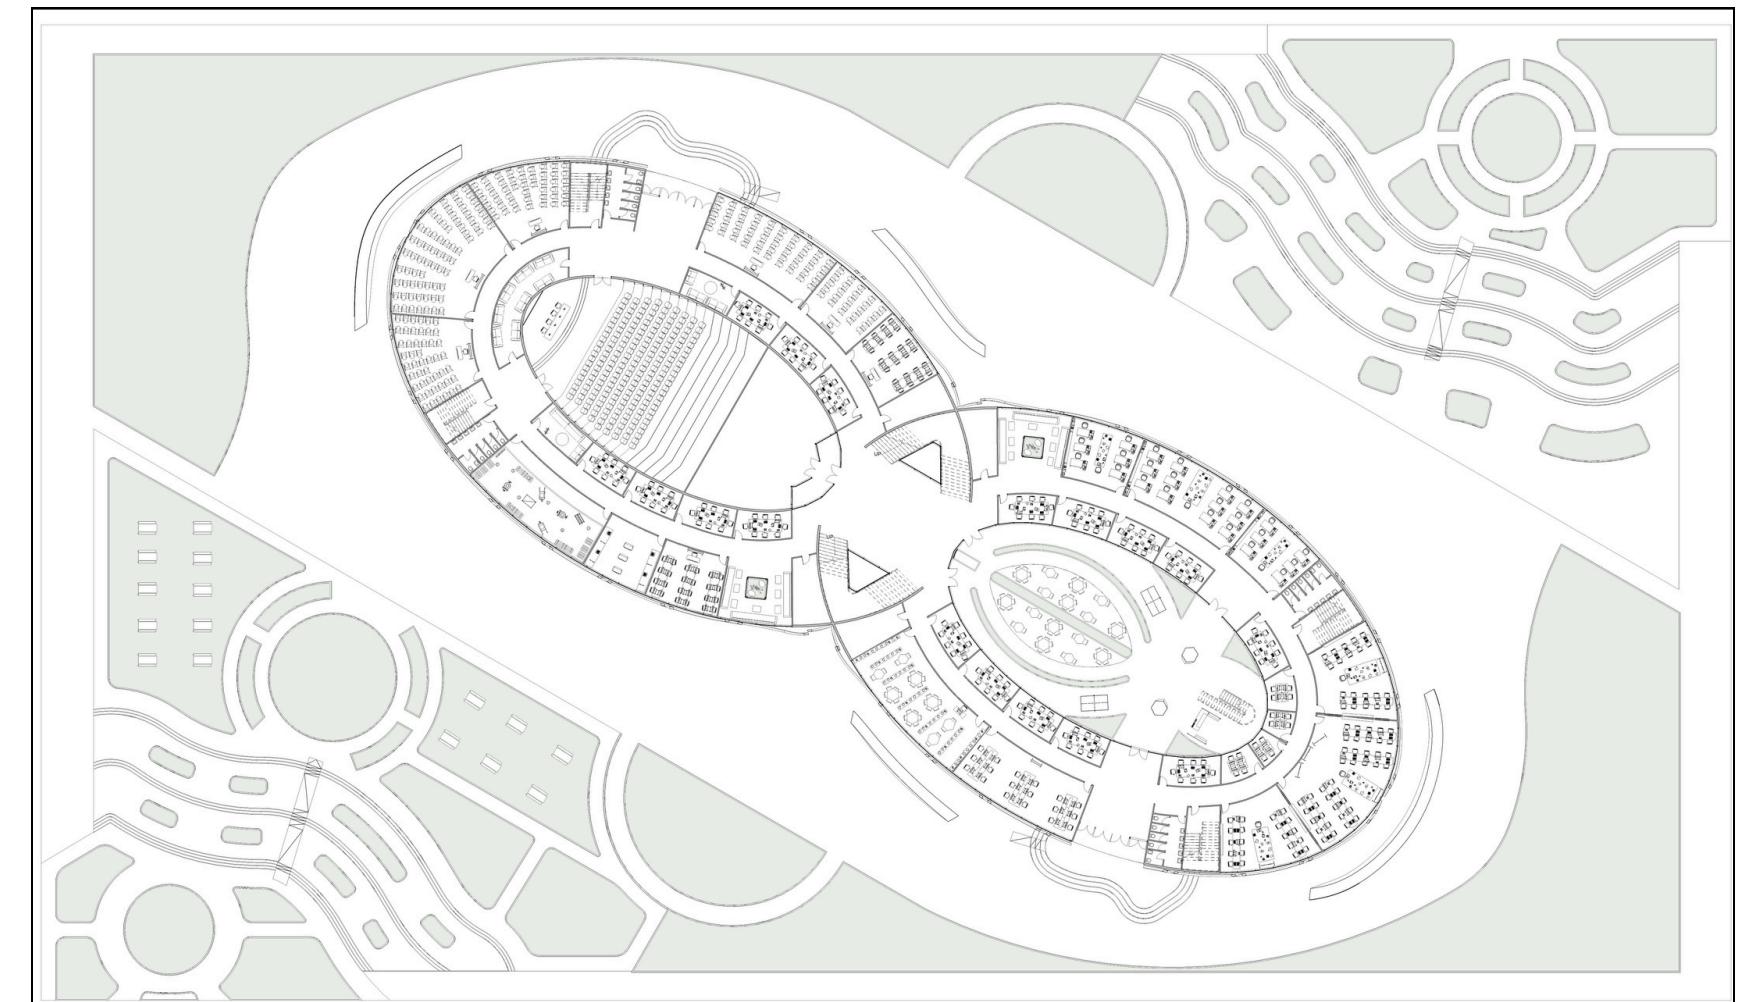

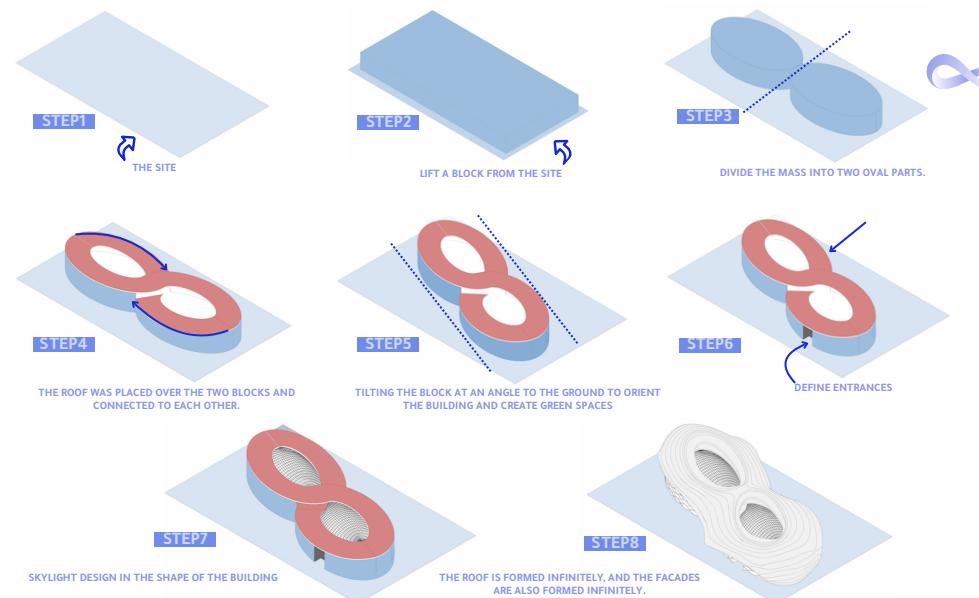

AREA : 10,676 m²

As part of Vision 2030, the Kingdom has sought to develop cultural and creative education, enhancing innovation and increasing job opportunities and GDP. With the growing interest in arts and architecture, the need arose to establish a specialized college in Riyadh that combines heritage and modernity. The college aims to prepare creative generations to compete globally and support sustainable development, thus strengthening the Kingdom's position as a center for creativity and design.

College of Architecture and Arts

The Concept "The 'Infinity' philosophy transcends design trends to represent a seamless, eternal loop where man, nature, and space coexist. It is defined by organic continuity, timeless relevance, and dynamic evolution, viewing architecture not as a static structure, but as a living, adaptable process of infinite creative potential

LUCIDAIR

LOCATION : Riyadh-
King Salman Road

TYPE : L U C I D A I R

AREA : 150,000 m²

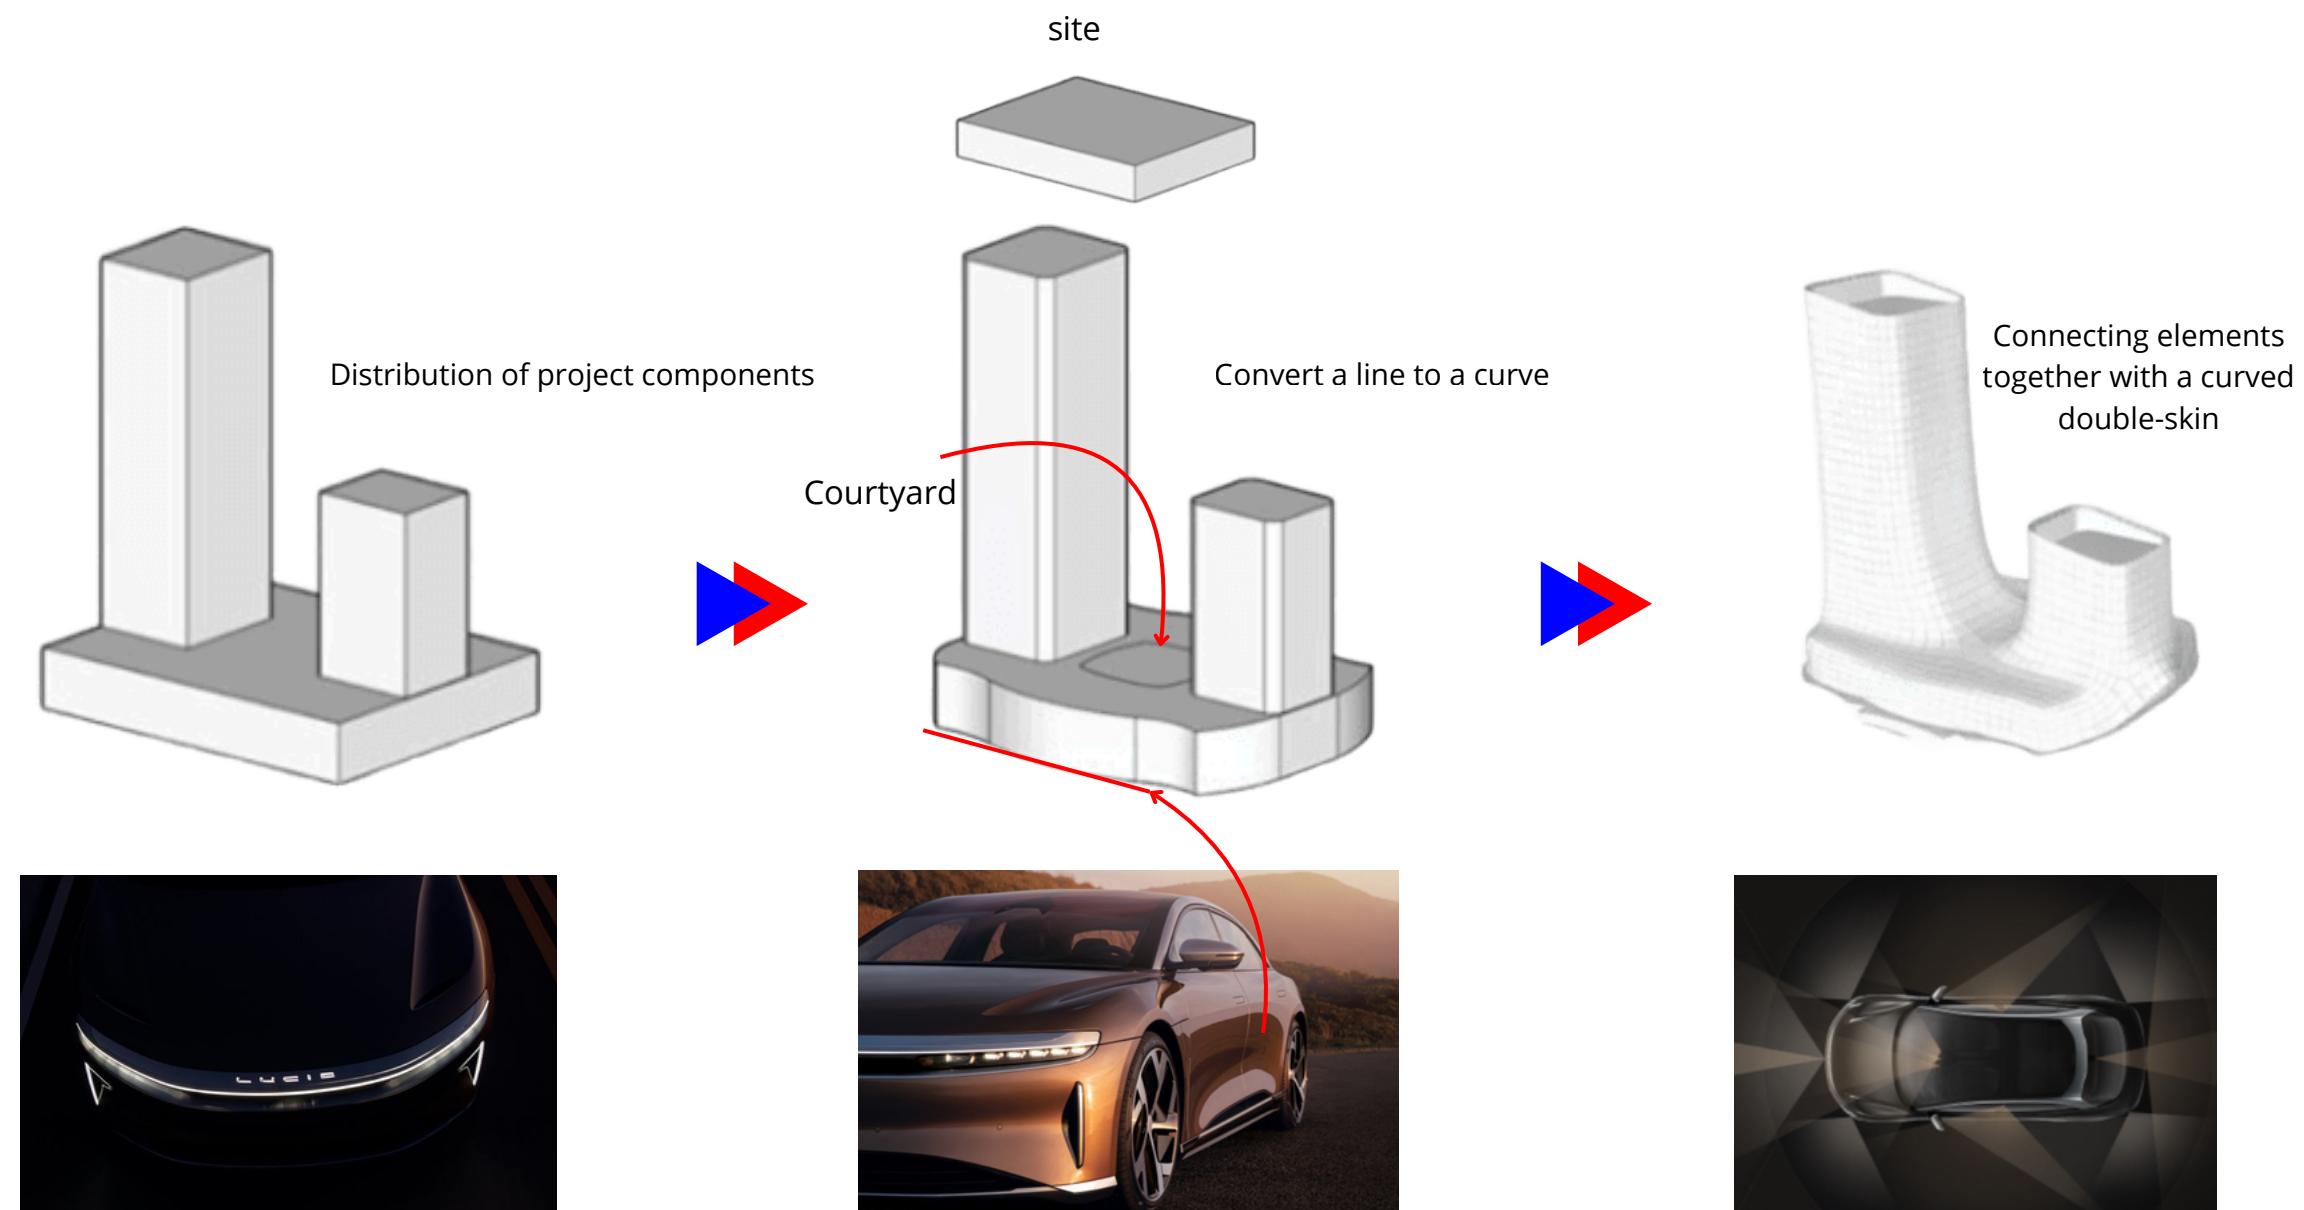

"This project is a sophisticated multi-functional landmark serving as the Headquarters and Flagship Showroom for Lucid Motors. Strategically backed by the Saudi Public Investment Fund (PIF), the building integrates high-end corporate workspaces with immersive gallery areas. The design reflects Lucid's identity as a leader in electric mobility, creating a dynamic environment that bridges innovative technology with sustainable architectural solutions in line with Saudi Vision 2030."

LUCIDAIR

The Concept Aero-Light Continuity"

"The design translates Lucid's DNA into architecture, mimicking the aerodynamic fluidity of the car's body through sweeping, organic curves. Inspired by the brand's iconic continuous lighting, the structure utilizes a curved double-skin to create a 'luminous horizon,' blending motion with light. This approach eliminates rigid boundaries, reflecting a seamless transition between futuristic technology and architectural form."

Majlis

LOCATION :Riyadh-Al-Jubailah

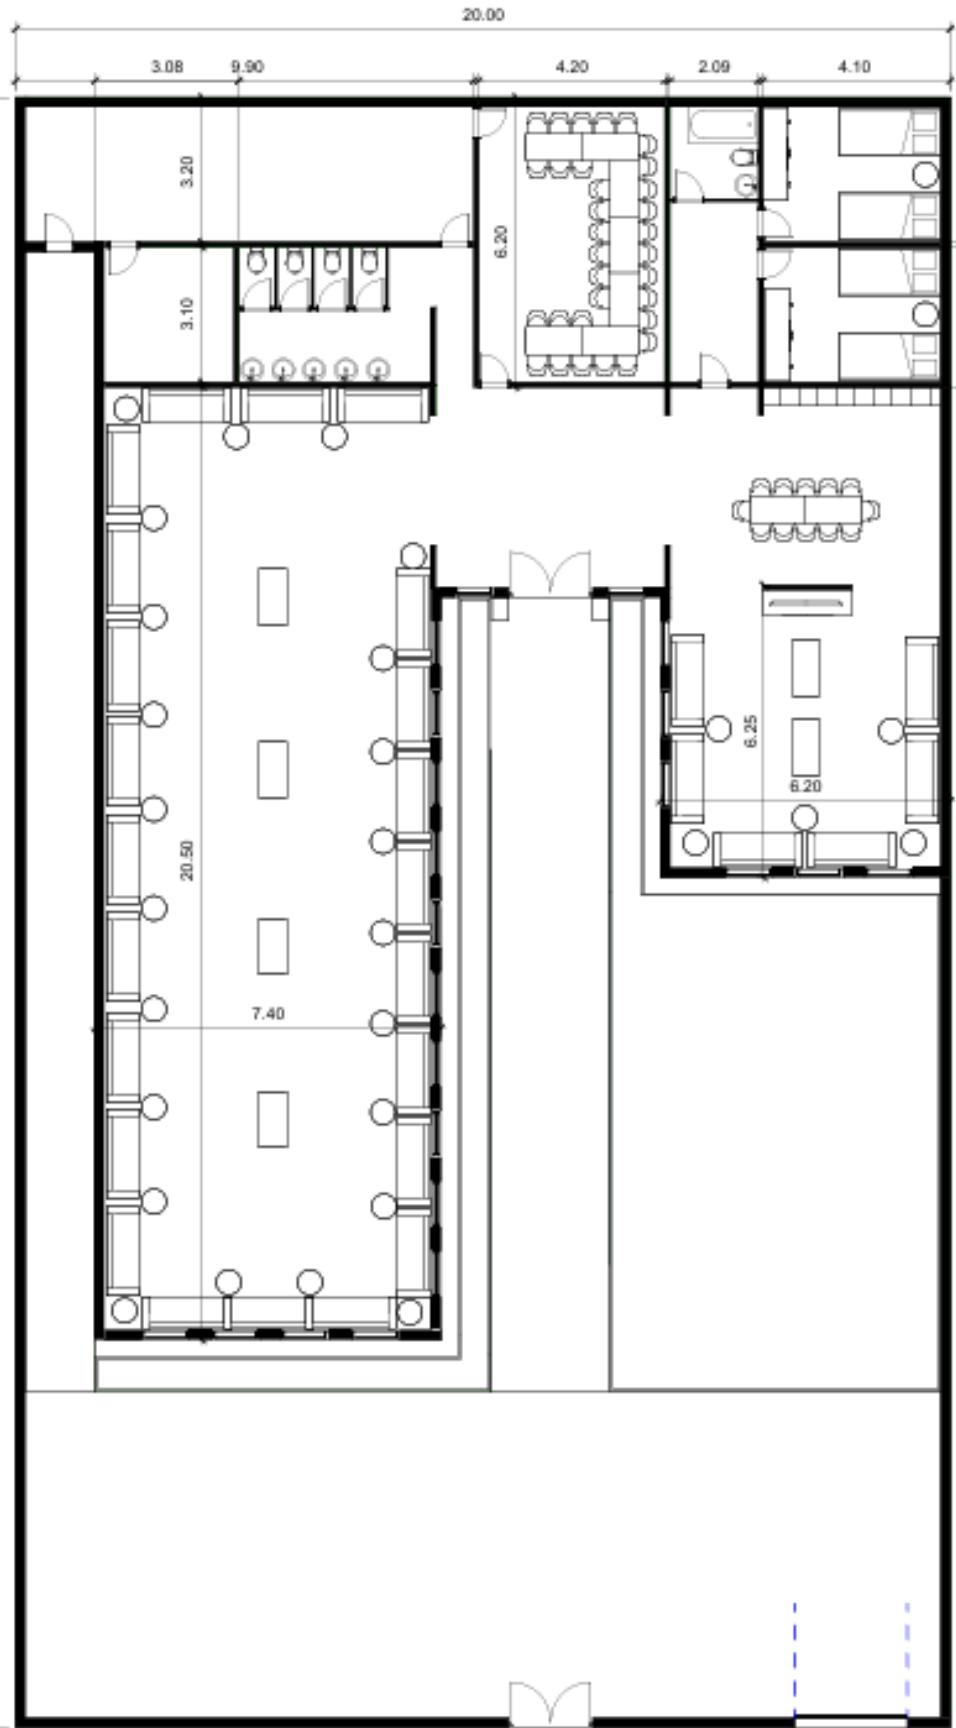

TYPE :Majlis

AREA :700m²

The Luxury Guest Wing is a premier hospitality suite designed for exclusive events and high-end privacy. It features a Grand Private Majlis with a capacity for over 100 guests, making it ideal for weddings and private functions. The wing also includes two luxury bedrooms for overnight stay, a spacious professional kitchen for large-scale catering, and a grand dining hall for formal banquets.

Majlis

Al Thumama Aviation Club

LOCATION Riyadh
Al-Thumama

TYPE :Al Thumama
Aviation Club

AREA : 2,130,000 m²

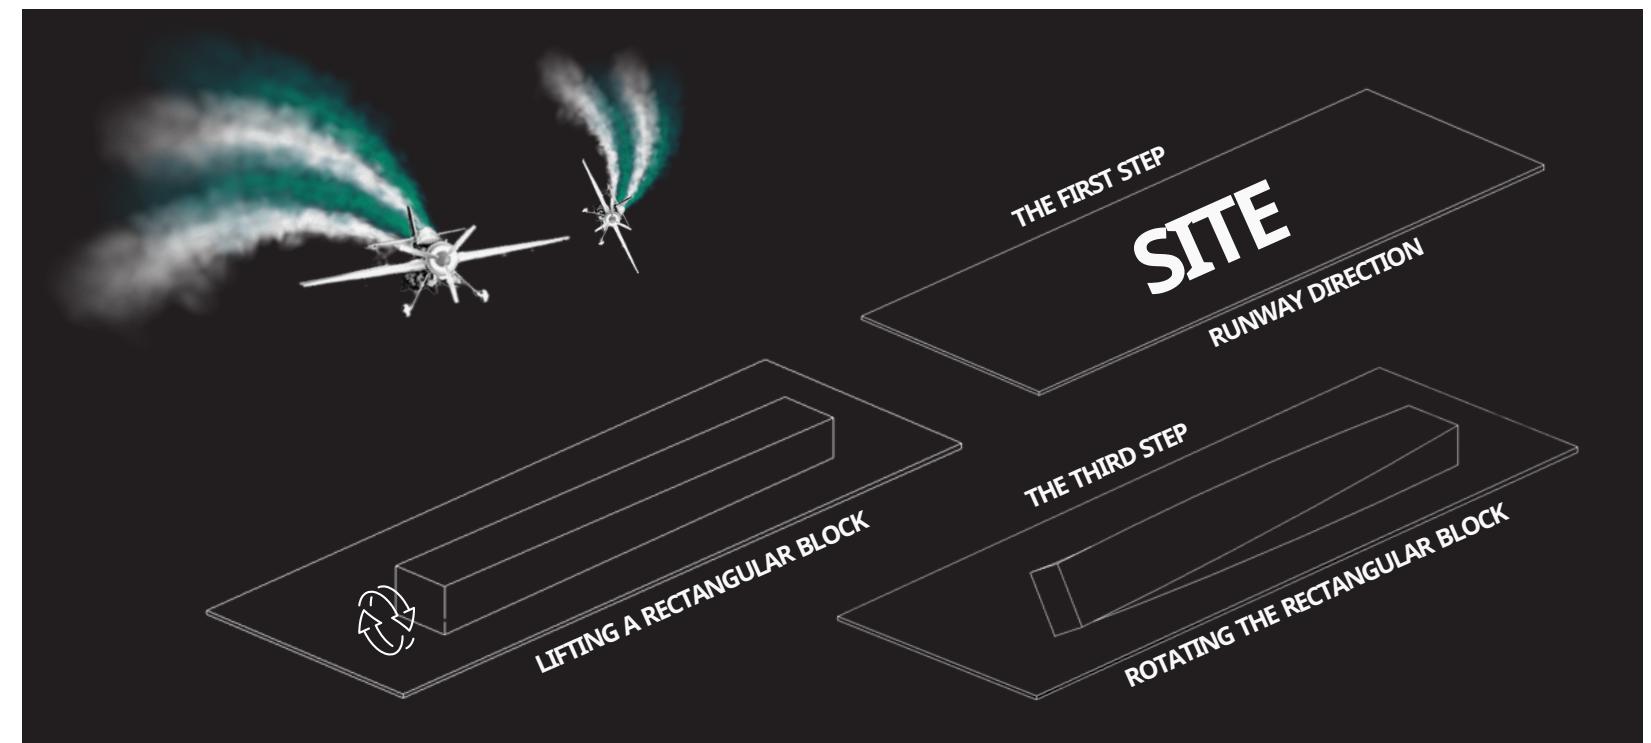

The Aviation Club in Riyadh is one of the leading centers for recreational and sports aviation activities in Saudi Arabia. Located at Thumamah Airport north of Riyadh, the club offers an ideal environment for aviation enthusiasts thanks to its prime location and modern facilities. It aims to promote the culture of aviation and aerial hobbies among different segments of society by organizing training courses, interactive activities, and providing services for private aircraft and hobbyists. The club also serves as a meeting point for aviation lovers and those interested in the latest technologies in this field, while contributing to domestic tourism through air shows, exhibitions, and specialized festivals.

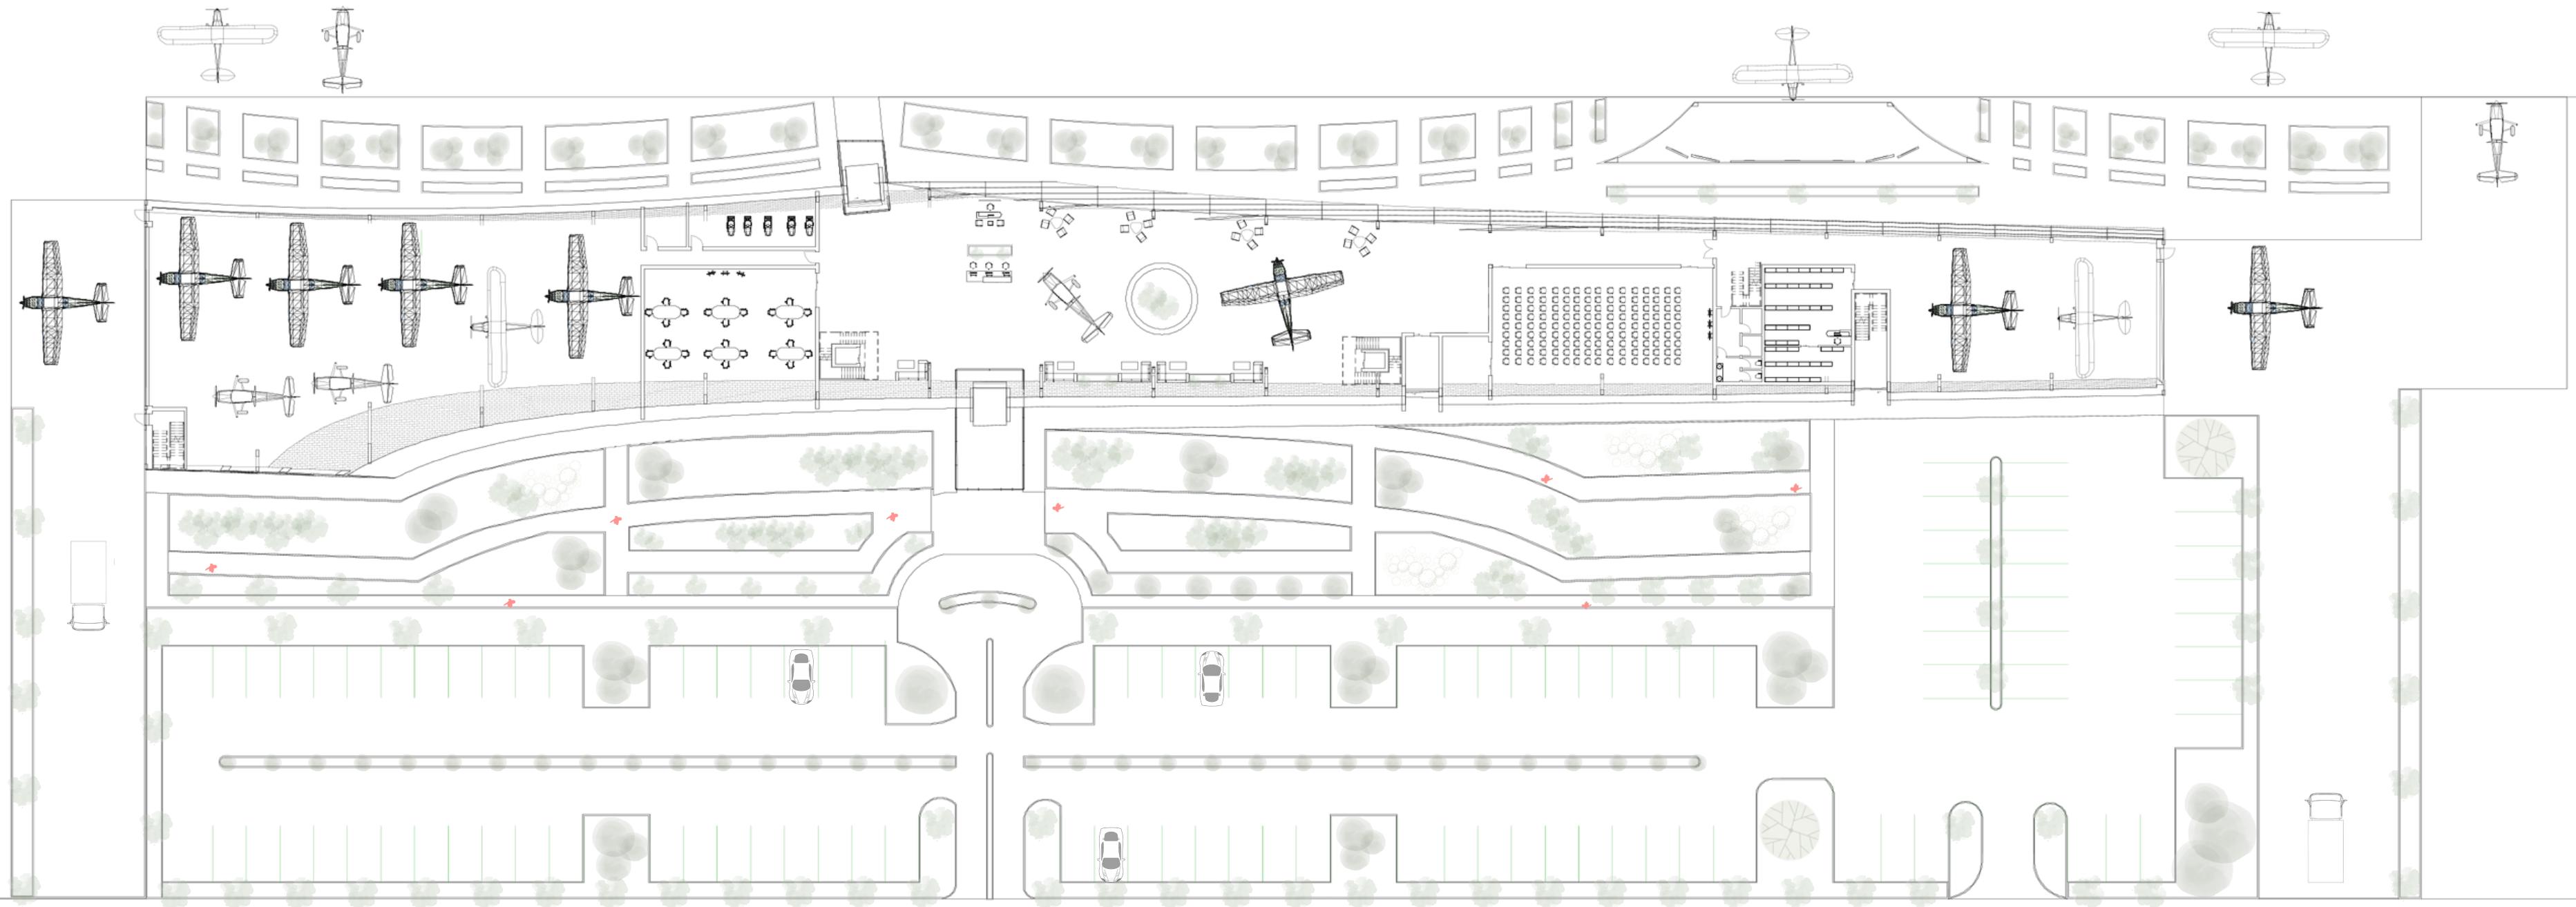

Al Thumama Aviation Club

The Concept The design of the Aviation Club in Riyadh emerges from the rotational movement of an aircraft around its axis, transforming this dynamic maneuver into a curved and twisted architectural mass that embodies strength, elegance, and fluidity. The building translates this motion into a helical form that conveys continuous progress and a forward-looking spirit, making the architectural space an extension of flight itself.

The volumes are shaped as a twisted ribbon that embraces the interior spaces and creates layered pathways for activities, while the façades follow flowing lines that emulate the movement of air around the aircraft's body during rotation. This configuration gives visitors a tangible sense of motion even while on the ground and establishes the club as a visual landmark that reflects Riyadh's identity as a center of innovation and aviation.

"The design represents a sophisticated synergy between engineering and aesthetics, where technical precision meets artistic expression to create a harmonious balance between structural integrity and visual elegance. This vision is grounded in a comprehensive commitment to sustainability that goes beyond form, focusing on environmental resilience and long-term economic value. By prioritizing resource efficiency and the integration of high-performance building systems, the project actively reduces its ecological footprint while enhancing occupant well-being. This dedication to sustainable innovation ensures that the building operates as a future-proof asset, fully aligned with the environmental and strategic goals of Saudi Vision 2030."
